

Operating System Lab

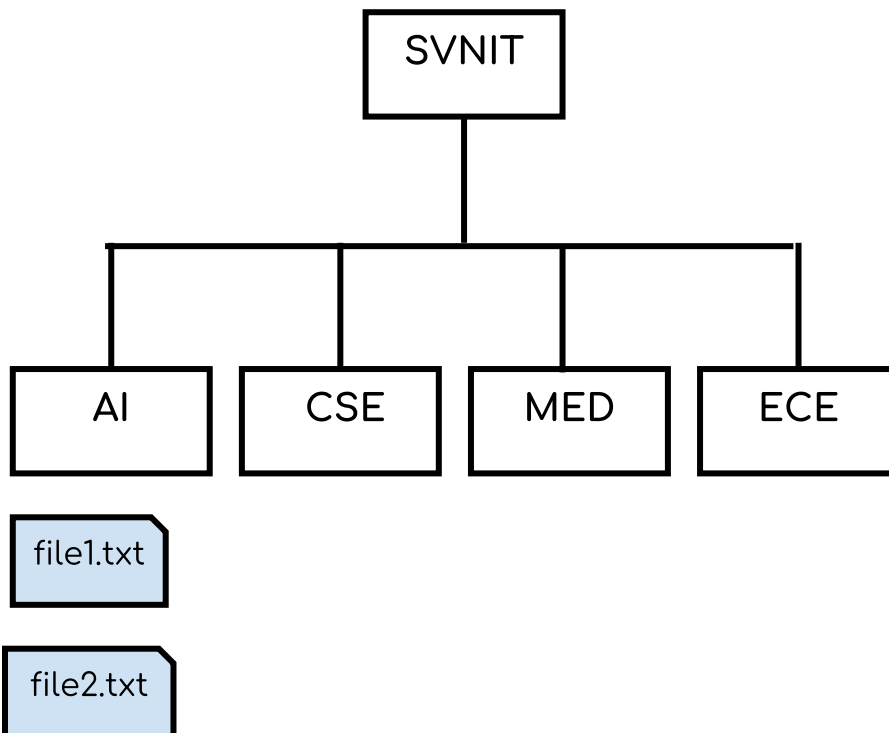

Lab 1- Basic Linux Commands

Submission guidelines:

1. Answers needs to be submitted in a pdf format
2. Take snapshots of code and output and paste in word document. Convert the word doc into PDF and submit
3. Mention your name and registration number on TOP RIGHT CORNER of the page.

Q. 1 Practice basic linux commands- ls, cd, pwd, mkdir, rm, rmdir, touch, cp, mv, cat, chmod, kill, top, ssh, etc.

Q. 2 Create a folder using mkdir with the name "SVNIT". Create subfolders inside the SVNIT folder as AI, CSE, MED, ECE

1. Create two text files in a AI folder with name file1.txt and file1.txt
2. Copy file1.txt from AI folder to ECE Folder
3. Move file1.txt from AI folder to MED Folder
4. Change the permissions of file1.txt from ECE folder such that owner can perform read, write and execute where others can perform ONLY read

5. Delete folder CSE
